## Description:

Our national parks are beautiful and unique places, often serving as an introduction to the outdoors and inspiring an appreciation for nature and wilderness. Similarly, stories and storytelling can serve as an introduction to other places and foster a powerful emotional connection to nature. Campfire Stories brings together tales about our national parks; some are by well-known writers such as John Muir, Bill Bryson, and Terry Tempest Williams, while others are from pioneer diaries or have been passed down through generations of indigenous peoples. Co-editors Dave and Ilyssa Kyu spent five months traveling and researching the stories in the book. They gathered each of these stories from public libraries, historical societies, arts and cultural organizations, museums, research centers, and national park archives. They interviewed park rangers,

historians, artists, curators, educators, and local residents, who all offered insights and guidance into the essence of each place, which was then used to select entertaining, diverse, and engaging writings that reflected each park and best told around a campfire.

An eclectic collection of campfire stories and well-written historical accounts spanning from Acadia National Park to Yellowstone National Park and journeys in between, *Tales from America's National Parks: Campfire Stories* by Dave Kyu and Ilyssa Kyu is an entertaining read, very insightful and very imaginative. The stories instantly draw a vivid mental image often transforming one back to their childhood while at the same time opening a whole new world. You will tag along and live vicariously through these craftily and beautifully written stories that could just as easily be shared with the family in front of the fireplace this Winter when a campfire is not an option. Highly recommended.
